**Subject:** RE: DO WORK ...STATEMENT OF WORK ITEMS for the new DO specific to GOLD KING BLOWOUT

Hi Joni - They want to set up a separate delivery order for things related to the incident, i.e., the settling ponds and the items Hays has listed below. I was thinking I heard you say you started a new delivery order a few days ago? If you haven't started one yet, maybe I can pull one off the I:drive and cut-and-paste.

Thanks!

Joyce

Hey Guys,

Steve was already updating the SOW for ER so I'm assuming we can just add this to the TO?

That sound ok Steve or are you too busy now?

In addition to the initial boiler plate language...

1. Provide an emergency treatment system using material available onsite.
2. Provide site security
3. Provide office space
4. Provide mine waste rock removal and mine dump stabilization as directed by the OSC.
5. Provide a portable water treatment system capable of treating the mine water at a potential flow of 1000 gpm. The water quality of effluent to be determined by EPA.

Possibly more later
